TECHNICAL SKILLS

Strong: JavaScript, Node.js, AngularJS, Backbone.js, Git, Gulp, Socket.IO, SQL, NoSQL, Redis, jQuery, HTML, CSS

Experienced: Nginx, Grunt, Bash, D3.js, Yeoman, WebRTC, Travis CI, Ionic, AWS, CoffeeScript, Stylus, Mocha, Chai

RECENT PROJECTS

Mementos | Full Stack Software Engineer and Scrum Master | mementos.io

A mobile application that enables users to create a narrative of moments sent in a digital time capsule

- Mobile app (iOS): AngularJS, UX/UI, Ionic, Cordova
- Developed RESTful API endpoints, modular routing, and Node.js/Express server testing with Gulp, Mocha, and Chai
- AWS: Content upload strategy and server authentication to allow for direct client to S3 data transfer
- Notification system: Socket.IO, Redis store for saving user sessions/authentication

Vagabond | Back-End Software Engineer | vagabondwith.me

Map creation platform to help users curate unique local/historical experiences to share with friends

- Database: MySQL schema, Sequelize query handlers, led migration to PostgreSQL for production deployment
- Node.js/Express server routing, Passport OAuth for Facebook authentication and user sessions

Linkuistic | Full Stack Software Engineer and Project Lead | linkuistic.herokuapp.com

Web App: Connecting you to anyone in the world who wants to learn your language

- Inherited a codebase, led a team of 4 to refactor to AngularJS and deploy on Heroku
- Back-end: Used WebRTC to create persistent video connections and Express / Socket.IO for pairing users

Gigaband | Full Stack Software Engineer and Product Owner

Platform that allows bands and venues to view each others' calendars, exchange messages, and request bookings

- Front-end: Leveraged Yeoman, Gulp, and AngularJS, login system, search, and messaging

EXPERIENCE

Bragd AS | IT Consultant / Web Developer

New York, NY 2012-2014 (2 Years)

- Led SharePoint migration, website upgrade, cloud-based accounting system to modernize company infrastructure
- Used Zapier to automate repetitive tasks for Mailchimp, LinkedIn / Hipchat OAuth, and other web hooks
- Increased email list to 1,000 recipients by developing responsive email templates and strategizing a marketing plan

EMI Music Publishing | IT Project Manager

New York, NY 2010-2012 (2 Years)

- Database migration: 100,000 songs between EMI Records' and EMI Music Publishing's SQL databases
- Developed XML specifications, led to a 95% increase in speed of EMI's registration process
- Led weekly development release cycles for all software update requests from EMI's application users
